

Tree Planting!

The Village is providing a 50/50 program for those interested in obtaining a tree for the parkway. The trees selected are appropriate for parkways and will be planted by our arborist. You may choose from the following trees. An order form is available from the Village Hall. Simply indicate your first or second choice, and include a check for \$275. The Village will order your selected tree. A limited number of trees are allotted for this year. However, once our limit is reached, you can pre-order for year 2018.

Norway maple:
Medium to fast growing, difficult to grow grass under because of shade, mostly insect and disease free.

Swamp White Oak:
Majestic tree, slow in growth. Planted for future generations. difficult to start, but well worth it after they are established.

Little Leaf Linden:
Cone shape, has problems with Japanese beetle, good shade tree, no diseases

Hornbeam:
A small shade tree, a good street tree

Ginkgo:
Great yellow fall color. No insects or diseases

Hackberry:
An excellent shade tree. Corky bark. No diseases or insect problems

Autumn Blaze Maple:
A cross between red and silver maples, fast growth, lovely autumn colors. No sewer problems, at least that I know of. (nice disclaimer)

Honey Locust Tree:
Vase shape, small leaves, tolerates just about everything including neglect. Some insect problems, but manageable.

Cleveland Pear:
It naturally grows in a tight, symmetrical shape. A semi-perfect oval. Its leaves fill in any gaps creating a near flawless surface area.

Green Vase Elm:
A medium to large deciduous tree, shape, clean foliage, attractive bark and resistance to Dutch elm disease

Tree Selection Form (50/50 Program*)

Name: _____

Address: _____

Phone: _____

Signature: _____

_____ YES, I would like a tree planted on my parkway.
*I understand my portion of the cost is \$275

My FIRST choice is: _____

My SECOND choice (if first choice is not available) is:

_____ NO, I do **not** want a tree.

Comments: _____
